

The **Central Environmental Laboratory** will hold the tilted symposium (**Dangers of Frequent usage for Water and Carbonated**

**Drink Bottles)**

on Monday 20/February/2017 in the debates hall of Chemistry Department at 9.00 am the presentation of the lecture shows the problems resulted from reusing plastic bottles because

they effect mainly on the human health besides the negative impact on environmental since they are made of non-corroding and non-degradable material the symposium include two main topics :

First- Reviewing the kinds of the plastic materials that used in the bottles industry with pointing out their features and defects.

Second- Discussing the health risks of their frequent use.
